

**Postdoctoral Research Fellow
Department of Entomology
Texas A&M University**

A post-doctoral fellow position is available in the field of insect chemical/molecular ecology, plant-insect-microbial interactions, and/or pest management within the Department of Entomology at Texas A&M University. The individual in this position will lead/participate in on-going research projects and will be expected to initiate new innovative research projects in the identified focus areas. Essential functions include conducting lab, greenhouse, and field experimental work, analyzing data, preparing reports and research manuscripts, developing, and submitting research proposals to funding agencies, and performing other duties as assigned. The successful candidate will participate in both basic and applied research relating to various crop-pest systems, including those of row crops, fruits, and vegetables. The individual will have an opportunity to participate in grant proposal development and mentoring of undergraduate and graduate students.

The position is renewable yearly depending upon satisfactory performance and funding. The minimum requirements for the position are: 1) Ph.D. in Entomology or a related discipline, 2) experience with chemical/molecular ecology techniques and/or microbial control of insects, 3) demonstrated experience in team research.

The position is open until a suitable candidate is selected. The selected individual will be expected to start in Fall 2022.

To apply, please send an application letter, graduate transcripts, and CV (including names and contacts of three referees) to the contact below.
